

# EXPAND A SUSTAINABLE THROUGH INTERNATIONAL SUSTAINABILITY AND CARBON CERTIFICATION

**ISCC is one of the leading certification systems for sustainability and carbon/greenhouse gas emission.**

**The Benefit of International Sustainability and Carbon Certification:**

- Covers entire supply chains from the field to the consumer
- Global scheme covering all kinds of biomass
- Covers entire ensures traceability
- Ensures highly effective and efficient audits offering comprehensive ISCC system documents
- Provides companies with a higher level of security
- Offers a unique, comprehensive tool for greenhouse gas calculation

**Scope ISCC EU and ISCC Plus**

ISCC system is a multi-stakeholder initiative. It Provides solutions for the implementation and certification of sustainable, deforestation-free, and traceable supply chains of:

Agricultural and forestry raw materials

Waste and residue raw materials

Renewable materials of non-biological origin

Recycled materials and fuels

**ISCC system helps producers take responsibility and reduces the risk of harmful ventures.**

ISCC stands for International Sustainability and Carbon Certification. It is a system for the implementation and certification of sustainable, traceable and deforestation-free supply chains. ISCC certification covers supply chains for all kinds of biomass (including agricultural and forest biomass), biogenic waste and residues, non-biological renewable materials and recycled carbon-based materials.

**ISCC EU certification covers the following raw materials and fuels as stated in the RED II:**

- Agricultural and forest biomass, waste and residues (including agricultural, aquaculture, fisheries and forestry residues), ligno-cellulosic and non-food cellulosic materials for the production of biofuels, bioliquids and biomass fuels, including advanced biofuels and biogas for transport (i.e. biofuels and biogas produced from feedstocks and biofuels, bioliquids and biomass fuels with a low risk or a high risk of indirect land-use change (iLUC))
- Liquid and solid waste streams of non-renewable origin or waste processing and exhaust gas of non-renewable origin for the production of recycled carbon fuels
- Energy derived from renewable sources other than biomass for the production of renewable liquid and gaseous transport fuels of non-biological origin

ISCC PLUS certification is applicable for the bioeconomy and circular economy for food, feed, chemicals, industrial applications (e.g. plastics or packaging) and energy from renewable sources used outside of the European Union (i.e. markets that are not regulated by the RED II). ISCC PLUS covers the same certification requirements as ISCC EU but can be customized to meet the needs of different markets or specific applications. All kinds of biomass, waste and residues, non-biological renewables and recycled carbon materials can be certified under ISCC PLUS.
