Data Protection Officer

This course provides participants with essential knowledge and competencies required for the role of a Data Protection Officer (DPO) in accordance with Indonesia's Law No. 27 of 2022 on Personal Data Protection (UU PDP) and the national competency standard SKKNI No. 103 of 2023. It covers the fundamental principles of personal data protection, organizational compliance obligations, governance practices, risk and incident management, and the strategic function of the DPO in ensuring lawful, accountable, and secure personal data processing. Designed for professionals responsible for data governance and compliance, this course equips participants to support their organizations in meeting regulatory requirements and strengthening personal data protection practices.

Information Security Training

Protect your organization with globally recognized best practices. This course gives professionals a clear, practical, and engaging introduction to information security grounded in leading ISO/IEC standards, including ISO/IEC 27001 and its supporting frameworks. Participants will discover how to strengthen resilience, reduce risks, and build trust by implementing international-grade controls and governance. Designed for modern professionals, this program translates complex standards into actionable strategies that help organizations stay secure, compliant, and competitive.

Artificial Intelegence (AI) Management Training

Step confidently into the future of responsible and trustworthy AI. This course introduces professionals to the powerful framework of ISO/IEC 42001, the world's first international standard dedicated to AI Management Systems (AIMS). Designed to help organizations govern, control, and continuously improve their AI systems, this program translates global best practices into practical strategies for safe, ethical, and compliant AI implementation.

Participants will discover how to manage AI risks, strengthen transparency, enhance stakeholder trust, and ensure that AI technologies deliver measurable value with robust governance. Perfect for organizations ready to elevate their AI initiatives to international-grade excellence.

Privacy Information Management Training

Strengthen your organization’s privacy readiness with the world-leading framework for data protection. This course introduces professionals to ISO/IEC 27701, the international standard for Privacy Information Management Systems (PIMS) that enhances ISO/IEC 27001 and 27002. Designed for organizations that manage personal data, this program translates privacy requirements into clear, actionable practices—helping you build trust, reduce compliance risks, and demonstrate accountability to customers and regulators. Participants will learn how to implement robust privacy controls, align with global regulations, and create a privacy-driven culture that supports secure and ethical data handling.

Compliance Management Training

Build a culture of integrity and organizational accountability with ISO 37301, the international standard for an effective Compliance Management System (CMS). This course equips professionals with practical tools and proven methodologies to identify compliance obligations, manage risks, and embed ethical conduct across all levels of the organization.

Participants will learn how to establish, implement, and continually improve a compliance framework that enhances transparency, supports regulatory adherence, and drives responsible decision making. Designed for organizations committed to governance excellence, this program turns ISO 37301 principles into actionable strategies that strengthen trust, reduce exposure, and elevate long term performance.

Fraud Control Management Training

Strengthen your organization’s integrity and resilience with ISO 37003, the international guidance for developing an effective Fraud Control Management System (FCMS). This course equips professionals with practical strategies to prevent, detect, and respond to fraud across all organizational functions—helping you protect assets, uphold ethical conduct, and maintain stakeholder confidence.

Participants will learn how to identify fraud risks, implement robust controls, establish effective reporting and investigation processes, and foster a culture of transparency and accountability. Designed for organizations committed to strong governance, this program turns ISO 37003 guidance into actionable practices that reduce vulnerabilities, enhance resilience, and support long term organizational trust.

Quality Management Training

Boost customer confidence and elevate organizational performance with ISO 9001, the world's leading standard for Quality Management Systems (QMS). This course equips professionals with practical, proven methods to build consistent processes, enhance service and product quality, and drive continuous improvement across all functions.

Participants will learn how to establish a robust QMS framework that supports efficiency, strengthens customer satisfaction, reduces operational risks, and enables long term business success.

Be Ready for ISO 9001:2026 — The Upcoming New Edition

A major update to ISO 9001 is underway, with the final publication expected in Q4 2026. This course also prepares participants for the key themes anticipated in the new revision—such as enhanced risk based thinking, stronger leadership expectations, alignment with digital transformation, and greater focus on ethics and sustainability.

By understanding these evolving directions early, organizations can position themselves ahead of the transition and smoothly migrate from ISO 9001:2015 to the 2026 edition once released.

Laboratory Management Training

Strengthen your laboratory's credibility, accuracy, and global recognition with ISO/IEC 17025, the international benchmark for testing and calibration competence. This course empowers laboratory professionals with practical knowledge to implement reliable technical processes, ensure valid measurement results, and build a robust quality system that meets accreditation expectations.

Participants will learn how to enhance reliability, reduce errors, improve workflow efficiency, and demonstrate consistent technical competence to clients, regulators, and accreditation bodies. Designed for modern laboratories aiming for excellence, this program transforms ISO/IEC 17025 requirements into actionable, real world practices that elevate laboratory performance and trust.

Asset Management Training

Unlock long term value from your assets with the newly updated ISO 55001, the global benchmark for effective Asset Management Systems (AMS). This course empowers organizations to optimize asset performance, enhance decision making, strengthen governance, and improve lifecycle planning using the most current international best practices.

Participants will learn how to implement a structured asset management framework that integrates strategic planning, risk management, sustainability considerations, data driven insights, and competency requirements—reflecting the significant advancements introduced in the 2024 edition. Designed for organizations committed to maximizing value and improving operational resilience, this program turns ISO 55001 principles into practical strategies that elevate efficiency, reduce uncertainty, and support sustainable long term performance.

Project Management Training

Build stronger, more consistent, and more successful projects with the ISO 21500 and ISO 21502 project management framework—recognized globally as the modern foundation for professional, scalable, and organization wide project management excellence. This course helps professionals understand and apply internationally aligned concepts, governance structures, and best practice methods across diverse project types.

Participants will learn how ISO project management standards shape effective planning, execution, monitoring, and control using clear roles, improved decision making, structured processes, and consistent terminology.

Drawing on the latest guidance from ISO 21500:2021 (context and organizational concepts) and ISO 21502:2020 (detailed project management practices), this program transforms global PPPM standards into practical tools for delivering successful, value driven projects in any industry.

Automotive Quality Management Training

Achieve world class automotive quality and become a trusted partner in the global supply chain with IATF 16949, the industry’s leading standard for Automotive Quality Management Systems (AQMS). This course delivers practical, high value insights into building a robust, efficient, and customer focused quality framework that meets the stringent expectations of automotive OEMs worldwide.

Participants will learn how to integrate defect prevention, variation reduction, and continual improvement into their operations while aligning with the latest IATF 16949 certification requirements. With the 6th Edition Rules now in effect—bringing significant enhancements to audit processes, readiness assessments, risk based audit duration, and certification structures—organizations gain updated knowledge to navigate compliance confidently and stay competitive in a fast moving automotive landscape.

This program transforms complex IATF requirements into clear, actionable strategies that improve process reliability, strengthen supply chain performance, and ensure consistent delivery of safe, high quality automotive products.

Occupational Health and Safety Management Training

Create a safer, healthier, and more resilient workplace with ISO 45001, the world’s leading standard for Occupational Health & Safety Management Systems (OHSMS). This course equips organizations with practical strategies to prevent work related injuries, reduce risks, strengthen safety culture, and meet legal as well as stakeholder expectations.

Participants will learn how to implement a proactive, risk based safety framework that enhances operational reliability, boosts employee morale, and supports long term business continuity. Designed for modern organizations committed to protecting their people, this program translates ISO 45001 principles into actionable methods that drive measurable improvements in workplace safety and organizational performance.

Integrated Management System Training

Streamline your operations and elevate organizational performance with an Integrated Management System (IMS) that unifies multiple ISO standards—such as ISO 9001 (Quality), ISO/IEC 27001 (Information Security), ISO 14001 (Environmental), and ISO 45001 (Occupational Health & Safety)—into one cohesive, efficient framework. This course empowers organizations to break down management silos, eliminate duplicated efforts, and harmonize governance across quality, safety, environmental, and security functions.

Participants will learn how to leverage the Annex SL / Harmonized Structure shared across modern ISO standards, enabling seamless integration of policies, processes, controls, and strategic objectives. With practical guidance and real world examples, this program helps organizations strengthen consistency, improve risk management, reduce audit time, and build a culture of excellence supported by unified leadership and continual improvement.

Designed for forward thinking organizations, this course transforms complex multi standard requirements into a single, powerful system that enhances efficiency, resilience, and competitive advantage.

Quality Tools Training

Strengthen your organization's product quality and manufacturing reliability with the Quality Core Tools, the globally recognized methodologies that form the backbone of modern automotive and advanced manufacturing quality systems. This powerful training program equips professionals with end-to-end competency in APQP, FMEA, Control Plan, SPC, MSA, and PPAP—the tools required by leading OEMs Customer-Specific Requirements (CSR) and essential for meeting IATF 16949 expectations.

Participants will learn how to plan quality into products from the earliest design stages, identify and mitigate risks before they occur, establish robust process controls, validate measurement systems, and deliver fully compliant production submissions. Through practical examples and industry-focused insights, this course transforms complex quality requirements into actionable, real-world practices that improve efficiency, reduce defects, and enhance customer confidence.

LEARNING PATH

TRAINING IS PROVEN TO BE ONE OF THE MOST EFFECTIVE WAYS TO DEVELOP THE SKILL AND KNOWLEDGE OF EMPLOYEES

Foundation Level

Awareness: Awareness training is a one-day program that covers the requirements and benefits of management systems.

Understanding: Understanding training is a two-days program designed to provide an introduction to Management Systems, including their concepts, organizational benefits, and key requirements.

Professional Level

Implementation: You should already have a solid understanding of the standard's requirements. This training will help you learn how to evaluate the effectiveness of Management System implementation within your organization.

Certified Internal Auditor: The Certified Internal Auditor training is a two-days program that covers the requirements of Management Systems and the guidelines of ISO. 19011:2018.

Master Level

Certified Lead Implementer: The Certified Lead Implementer program is a four-days course designed by our experienced tutors to help you learn how to establish a Management System that conforms to the relevant standards within an organization. You will also gain insights into developing policies, processes, and procedures for your Management System.

Certified Lead Auditor: CBQA Global's Certified Lead Auditor program is a comprehensive five-days course designed to prepare prospective Management Systems Lead Auditors and Auditors. Facilitated by our experienced tutors, this program provides the knowledge and practical skills needed to plan and conduct both internal and third-party audits in alignment with ISO 19011 and ISO/IEC 17021-1 standards. Our Certified Lead Auditor Program is recognized by EXEMPLAR GLOBAL.
